## FastPath™

### OFFLINE PROGRAMMING SOFTWARE

FastPath is an efficient offline programming tool to create programming routines for any PVA automated robot at your desktop. This capability allows an operator to begin the programming process without the presence of a machine so initial process implementation is accelerated and machine utilization is improved. FastPath contains a Windows® interface for creating spray areas or multi-dimensional lines.

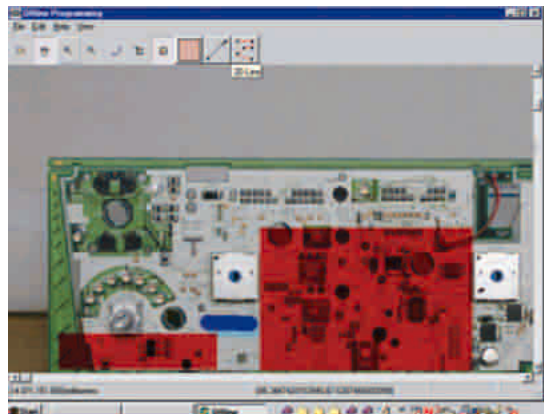

FastPath has many integrated features including:

- ▲ Flexible graphical file image import options
- ▲ CAD file import eliminates distortion evident in digital photographs
- ▲ Click and drag program creation of area fills and lines
- ▲ Windows® interface design increases simplicity
- ▲ Multi-colored programming functions allow the operator to decipher different dispensing routines
- ▲ Transparent coverage area allows component and marker identification

For more information on PVA's dispensing capabilities, please contact one of our sales representatives at (518) 371-2684.

PVA also offers the following products to improve your dispensing application:

|         |  |
|---------|--|
| PVA250  | Benchtop dispensing system                   |
| PVA550  | Benchtop selective coating/dispensing system |
| PVA3000 | Automated dispensing system                  |
| PVA2000 | Selective conformal coating system           |

Windows® is a registered trademark of Microsoft Corporation.
